Sterile, Safe, Powerful, Disposable, and Cost-Effective

The Bone Shark’s powerful streamlined design delivers 100% yield of autograft making it the preferred choice over bulky, dangerous, capital intensive, re-usable bone mills.

The Bone Shark Disposable Bone Mill is the safest, most powerful, versatile and cost efficient product of its kind on the market today.

Powerful, Efficient and Cost-Effective

- The Bone Shark Disposable Bone Mill is ideally suited for spinal fusion, orthopedic reconstruction, maxillofacial procedures, restorative dental implants, small bone surgery and ear, nose and throat surgery.

- Bone Shark's patented triple-fluted cutter will cut cortical and cancellous bone into the desired particulate size.

- The Bone Shark is sterilized, pre-assembled and ready-to-use.

- The Bone Shark Mill is designed to create bone chips of the sizes surgeons prefer, and operate manually without the need for external power sources.

Ordering  Cat # BS101
